Papagiannopoulos Bros

tilke

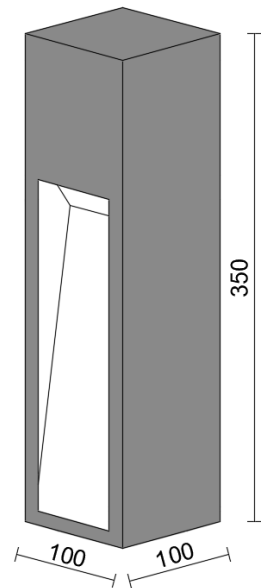

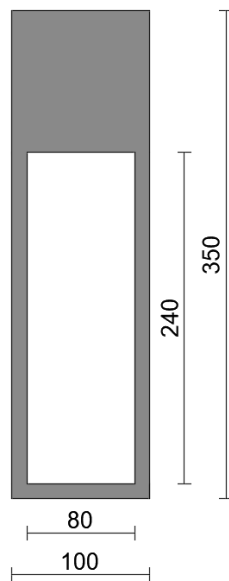

LUMINAIRE DESCRIPTION

Tilke is a custom-made bollard with clear lines designed to achieve indirect lighting of exterior places and pathways. Diffuser's absorptions ensure visual comfort and minimum glare.

The fitting is made of stainless steel and it can be produced in any height, dimension, and color.

Its high aesthetics and quality of construction make it ideal for applications in both public and private spaces. It is ideal for installation near to sea due to its high corrosion resistance.
